

7. JIAOZHOU BAY BRIDGE:

Jiaozhou Bay Bridge (or Qingdao Haiwan Bridge) is a 26.7 km (16.6 mi) long roadway bridge in eastern China's Shandong province, which is part of the 41.58 km (25.84 mi) Jiaozhou Bay Connection Project. The longest continuous segment of the bridge is 25.9 km (16.1 mi), making it one of the longest bridges in the world. The Jiaozhou Bay Bridge transects Jiaozhou Bay, which reduces the road distance between Qingdao and Huangdao by 30 km (19 mi), compared with the expressway along the coast of the bay, reducing travel time by 20 to 30 minutes.

The length of the Jiaozhou Bay Bridge is 26.7 km (16.6 mi), of which 25.9 km (16.1 mi) are over water, representing the aggregate length of three legs of the bridge.
